

**Drava International d.o.o.,  
OSIJEK**  
*YOUR PLASTIC RECYCLER*

Drava International

Drava International

# INTRODUCTION

Dear customer,

We proudly present our new catalogue of PET recycling products for food packaging.

Environmental responsibility as one of our top priorities makes us focusing on delivering 100% recyclable products to our customers. All our rPET products are made with up to 80% recycled material and are 100% recyclable which makes a significant impact on protecting the environment.

Drava's recycling program uses special bottle bins positioned on retailer parking lots where consumer inserts a bottle in the bin and receives a discount coupon which makes everyone recycling.

Plastic bottles go through the recycling process to be reused for new products. PET is first cut into little pieces and then cleaned, the pieces are transformed into little pellets that are used to manufacture new products.

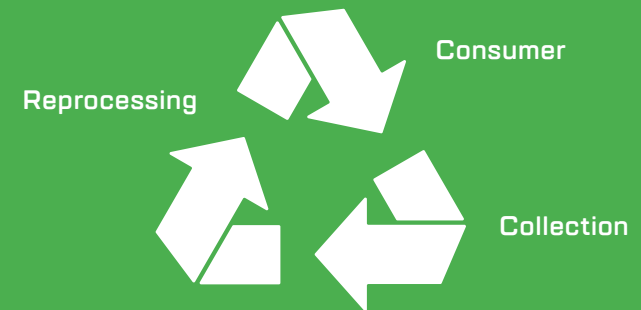

Plastic Circular Economy means that plastics bottles never become waste; they get collected, sorted and recycled to re-enter the economy as valuable components such as new plastic products.

100% recyclable material, reused in many applications, PET has the potential to achieve a 100% circular economy model.

## THE CLOSED LOOP RECYCLING SYSTEM

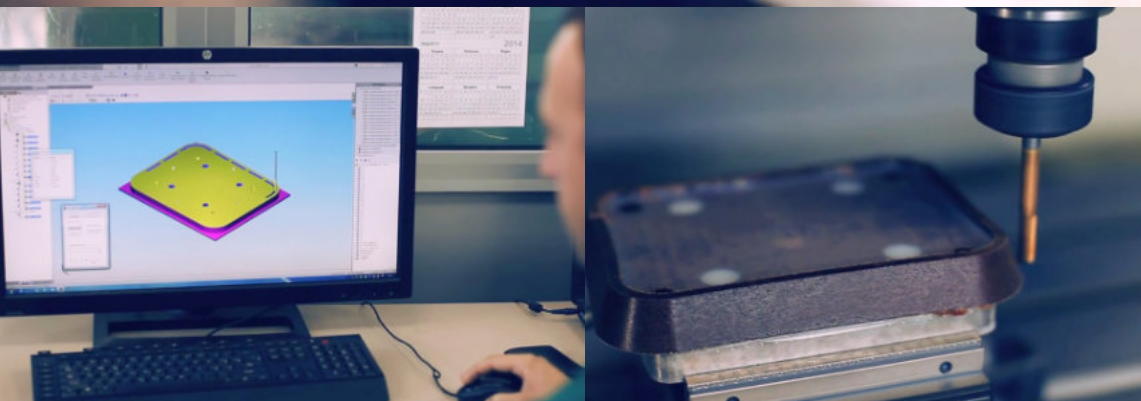

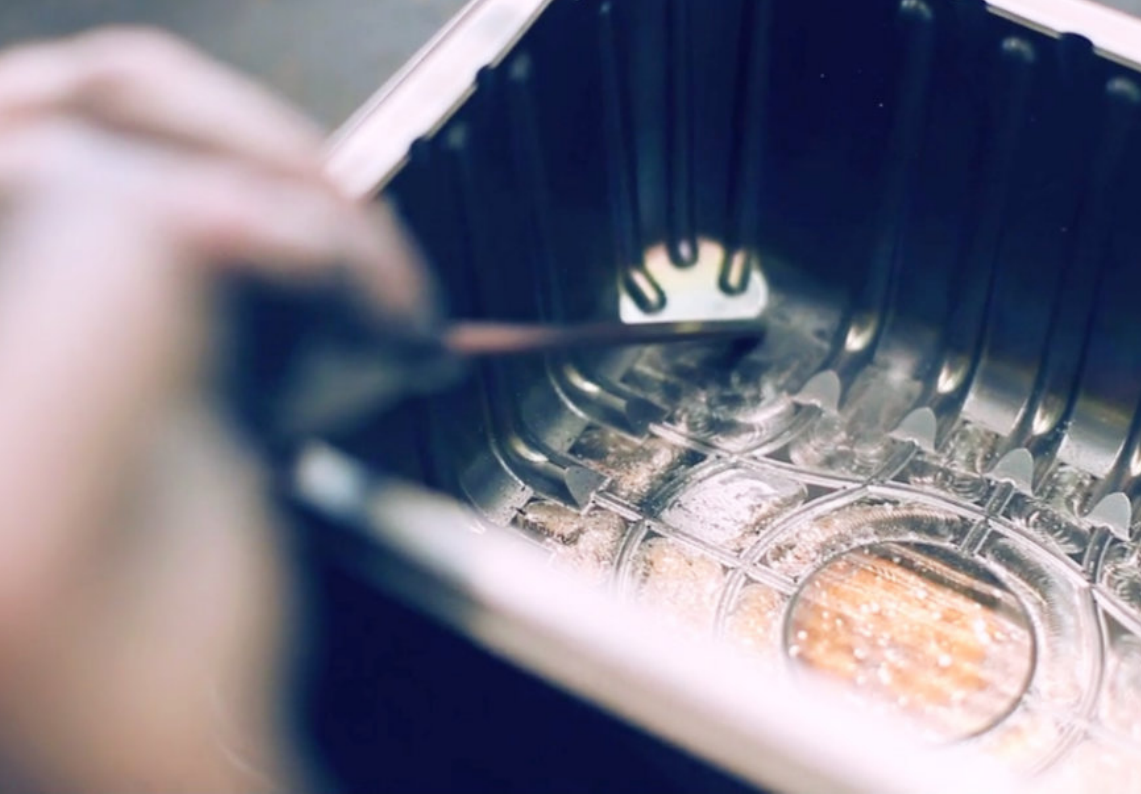

## PRODUCT

## WASTE MANAGEMENT

Recycling PET leads to around 60% energy savings and more than 70% lower carbon dioxide emissions compare to virgin plastics.

Since years Drava has been recognized to be the one of the best producers of rPET products when it comes to quality, functionality and flexibility. Apart from our wide standard range, we can also offer you the ideal solution when it comes to custom packaging. Our R&D department and mould production department guarantee professionalism on the highest possible level.

**SPRING 2021:**

ALL DRAVA PRODUCTS WILL BE  
AVAILABLE FROM 100% RECYCLED  
PET MATERIAL!

**📌 PRODUCT HANDLING:**

Storage of PET products needs to be in a dry, well ventilated area without direct sunlight, on a temperature not lower than -20°C or higher than +40 °C. Optimum storage temperature is from 5 °C to 25 °C. It also needs to be kept away from heat, sparks and flammable products.

PET products should not be used in microwave, conventional oven or served with hot food. Recommended usage is at -20 C to +40 C.

All our products are packed in special 5 layer cardboard boxes with additional inner LDPE sleeves (with all food certificates) that are also being produced in Drava. This special care on the packaging minimizes potential damages during long distance transports.
